<b>Floors (underground)</b>	1		

### Years and costs

<b>Year (construction start)</b>	1984	<b>Building costs</b>	\$ 250,000,000
<b>Year (construction end)</b>	1987		

### Features & Amenities

- One of the city's famous buildings
- Ornamental illumination is installed

### Facts

- The Brazos Street entrance is different in design, as it not only creates an open-air plaza, but also connects to the former Federal Land Bank Building, which was preserved prior to the building's construction.
- The interior of the building also takes cues from Mexican design, as the main lobby seems to resemble an upscale resort and uses several elements from the exterior. The lower level food court has a huge marble waterfall, cascading from the first level.
- This was the only large, privately-funded project under construction in the Downtown district at the time it was built, owing to the economic situation of the era.
- This building has no connection to the extensive tunnel network, and only one skywalk which connects to DoubleTree Hotel Houston-Allen Center.
- The building's five massive air conditioning units are housed within the top of the "crest" of the building.
- Though the building has a Bagby Street address, the main entrance is at the corner of Brazos and Dallas Streets.

- The Brazos Street plaza once contained a massive granite carving of the Texaco logo, which was removed once the company merged with Chevron. After the merger, plants and new landmark signage were added to the space.
- The crown of the tower is said to resemble a Bald Eagle with its head and wings. The sides of the tower also have angles which appear to be the tips of the wings of the eagle.
- Heritage Plaza's granite, stepped pyramid cap was inspired by architect Mohammed Nasr's vacation in the Yucatán.
- During 1986's historic Rendez-vous Houston concert, the building supported a 20+ story screen constructed of thousands of pieces of canopy, and a completed section of the 18th floor served as a rehearsal area for musician Jean-Michel Jarre and his band during bad weather.

# Get Emporis Research today and benefit from our worldwide database now!

## Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

## Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

## Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

## Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
