Spatial dimensions

Height (structural)	504 ft	Floors (overground)	36
Height (roof)	504 ft	Elevators	17
Length	170.01 ft	Usable Floor Area (UFA)	Contact us
Width	100 ft		

Years and costs

Year (construction start)	1967	Year (last renovation)	2009
Year (construction end)	1970	Building costs	\$ 20,000,000

Features & Amenities

- Helipad is available

Facts

- Tallest building in Indiana from 1970 until 1982, when the One American Square was completed.
- The tower was topped out on November 9, 1968.
- One Indiana Square was constructed on the site previously occupied by the Knights of Pythias Building and the 200 block of Massachusetts Avenue. This diagonal street was vacated from the Ohio Street/Pennsylvania Street intersection to the New York Street/Delaware Street intersection at that time to make way for the new tower.
- The tower rises from the west side of a broad platform that occupies the entire southern half of the block.
- One Indiana Square was originally conceived to include two additional towers on the northern portion of the same block; one of approximately 20 floors at the SW corner of Delaware Street and New York Street, and the other of approximately 12 floors at the SE corner of New York Street and Pennsylvania Street. These towers were never built.
- One Indiana Square received a new crown design and exterior lighting scheme in the early 1990s. It proved to be unpopular with both architecture critics and the public at large.

- The original facade of glass, aluminum, and marble was plagued with problems. The curtain wall was prone to window damage during severe thunderstorms and the marble began to deteriorate from exposure to freezing and thawing cycles.
- Strong winds from a severe thunderstorm blew out numerous windows on the higher floors of the north and west sides on April 2, 2006.
- A new design was announced in March 2007 to replace the damaged facade. Designed by Gensler of San Francisco, the tower was re-skinned over a two-year period.
- The base of the tower retains the original facade treatment.

Involvement companies

Architect.....

Thomas E. Stanley
Dallas
U.S.A.

Associate Architect.....

Wright, Porteous & Lowe
Indianapolis
U.S.A.

Get Emporis Research today and benefit from our worldwide database now!

Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
