- Each sky garden is treated as an urban scale verandah, sheltered at high level by the preceding sky garden and open sided for formal and visual transparency.
- Introducing layers of elevated ground levels allow the precious but limited ground floor space to be multiplied, creating generous public areas for recreation and social interaction throughout the high-rise.
- WOHA adopted a club sandwich approach by creating a series of different strata, each with its own sky garden.
- The facade is made up of a total of 21 species of creepers to ensure the green facade is always lush and resilient during different weather conditions.
- In addition to 21 species of facade creepers , another 33 species of plants and trees are selected , making a total of 54 species of plants and trees.
- There are 1793 facade planter boxes.
