Facts

- Fifth Avenue Place was designed by the Stubbins Associates of Cambridge Massachusetts. Final design of the office/retail structure was done in conjunction with the locally based architectural firm Williams Trebilcock Whitehead.
- One significant feature of the building is its roof. This pyramidal roof is 124-feet tall and consists of four individual prisms clad in granite. This rooftop also serves as an enclosed mechanical penthouse for the building's cooling towers and the elevator machine room.
- Towering from Fifth Avenue Place is a 178-foot tall mast. It isn't a round mast though. This steel structure is actually 12-sided and measures four feet in diameter.
- The mast's hollow interior contains a ladder which gives access to the aircraft warning light on top. This mast is designed to withstand sways of up to 3 feet in any given direction in extremely high winds.
- The building is made up of 225,000 square feet of granite, 62,739 square feet of insulated glass windows and over 1,000 gallons of silicon sealant.
- The tower consists of 29 floors of office space (689,839 sq. ft.) rising above two levels of retail shops (46,100 sq. ft.) and a three-level underground garage for up to 250 vehicles.
- At night, the building is beautifully illuminated with more than 44,000 watts of light generated by 64 strategically positioned flood lamps.
- The Empire Building and the Jenkins Arcade formerly stood on this site. Both were demolished in 1984 to make way for this building.
- In 2005 the logo at the top of the building said HIGHMARK.

Get Emporis Research today and benefit from our worldwide database now!

Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
