<b>Floors (overground)</b>	21		

## Years and costs

<b>Year (construction end)</b>	1974	<b>Year (last renovation)</b>	1995
--------------------------------	------	-------------------------------	------

## Facts

- The building's original gold colored - and highly reflective - glass was a problem for drivers around downtown who were blinded by the sun's reflection. In 1993 it was announced that the glass would be changed to the current dark blue color.
- The renovation was performed by Starnet International Corporation, a firm which specializes in construction of pyramids, domes, and special facade structures.

- The top floor is occupied by the Headliner's Club which is a private lunch and dinner club.
- The building originally had a gold glass facade and a flat roof. In a 1994 renovation the glass was changed to blue and a covered space frame was added to the top, raising the height from 315 feet to 325 feet.
- This was the 2nd building in Austin to exceed the Texas State Capitol height. After completion it became the tallest office building in Austin from 1974 until 1975 when the Bank of America Center was completed.
- Typical floorplates for this building are 16,000 square feet.
- The Bank One sign atop the building was the highest in the city until 2004 when the Frost Bank Tower was completed.

# Get Emporis Research today and benefit from our worldwide database now!

## Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

## Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

## Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

## Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
