Floors (overground) 21

Years and costs

Year (construction end) 1970 **Year (last renovation)** 1999

Features & Amenities

- Courtyard is present
- Floodlighting at night
- Plaza is available to the public
- Variable walls can be built

Facts

- Travertine is used as the cladding for the 14 base columns as well as for the walls and floors of the ground floor lobby/elevator core and the below-grade concourse.
- Designed by famous architect and engineer team of Bruce Graham and Fazlur Khan. Both were responsible for designing the Hancock and Willis Towers in Chicago, Ill.
- The undulation and thickening of columns at the lower floors expresses the greater loads carried at these levels.
- The shaft is capped by a tall mechanical floor, articulated by thin, closely spaced columns at the exterior.
- There is no main column at any corner of the building, creating an illusion of beams and glass panels wrapping around the corner when seen from an angle.

Get Emporis Research today and benefit from our worldwide database now!

Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
