Facts

- At the base of the tower there is a broad podium that includes a restaurant, conference area and more.
- Twenty-two of the tower's floors are occupied by a 229-room hotel, the rest by offices, conference facilities and a sky bar.
- The façade is made of an irregular arrangement of metal-colored triangular panes of glass. It incorporates eight different types of glass distributed randomly over the surface so that no regular pattern can be detected.
- The parallelepiped form of the tower is topped by a rectangular cuboid, so that the upper floors project out beyond the shaft below.
